Introduction

Grants funding can come from federal, foundation, state, local, corporate, and private sources. Funding and in-kind donations are available from the most obvious and the most obscure places. You just have to ask! The purpose of this handbook is to provide educators, both traditional and non-traditional, with basic information about available funding sources that are **targeted for educational and/or environmental programs or projects**. We have tried to include a variety of sources that make it easy for educators (and students) to apply for and win a grant. This handbook is by no means inclusive of all available funding, but we hope that it will become a valuable resource for you. We plan to revise the listings in this handbook periodically by adding new resources as they become available and updating existing ones.

This handbook includes three types of grantmakers: foundations (nonprofit, nongovernmental organization), corporate (for profit, nongovernmental organizations) and private. We have not included community or federal grantmakers specifically, but have general contact information for both in the Resources section on page 52.

In addition to financial support, corporate grantmakers often provide in-kind gifts and other types of support. For example a major clothing corporation may donate gift cards or merchandise to your project, while an office supply company may also donate products. We have included some of these types of corporate grantmakers. Check with those included, as well as other retailers that you frequent, to see what type of support they can provide.

How do I get started?

Think of this handbook as the beginning. It is intended to be a simple *starting point* in your journey to find funding for your projects and programs. Once you have started on your journey, many more doors will open to you. A variety of list serves can help you learn about grants available from different organizations as they are announced. In addition, think about attending workshops or seminars on grants to increase your knowledge about the grantmaking process and improve your proposal writing skills.

1. Begin by writing up your project or program idea in a fairly detailed but concise format. Think through the who, what, why, when, and how of your project. Once you have your project clearly articulated in a concise document of about 2-3 pages, use it as a template to refer to and revise as you go along in this process.
2. Next, gather all your supporting materials. Verify your school tax status. Then obtain your schools 501 (c)(3) letter and tax ID Number (the majority of the grantmakers in this handbook require the recipients to have 501 (c)(3) status). Make several copies of the letter and keep it with your proposal template.
3. Then, flip through this handbook to determine which grants seem right for your project or program. You can use the **Icon Keys** located in the top right hand corner of each page to search by dollar amount or project/curriculum OR use the Cross Reference Index on page 56 to find grants that specify the creation of curriculum/projects, or provide funds over or under \$1,000. For example, if you know your project or program is going to need a \$1,500 grant, check out the grants available in the *More than \$ 1,000* section of the Cross Reference Index.

Involving your students:

Keep your students in mind when considering applying for funding. How can you get them involved? The earlier in the process you involve them, the more invested they will become in the project or program. When you share some of the responsibility of the grant seeking process with your students it will ensure a higher level of motivation and participation from your students. Many grantmakers encourage student involvement and may look *more* favorably on your proposal if students have played an active part in developing it. Below are several suggestions for involving students in the grant writing process.

- Have students write the initial who, what, when, where, why and how summary of the project before the grant application process begins.
- Have students search the Internet to find grant matches with their project proposals.
- Have students research the grantmaking organization to find out their areas of interest that should be reflected in the grant application.
- Divide the grant application form into separate sections. Assign pairs of students to work on different sections. Assign two or three groups of students to the same section of a grant proposal. Have them critique each other's final piece and rewrite a new one based on the best work of each group.
- Have students review the grant requirements and guidelines before submitting a proposal. Ask them to develop a scoring tool that evaluates the appropriateness of the grant for your project needs.
- Have groups complete grant applications to different grantmakers for the same project. Submit a compilation of the best ones.
- Have students make the initial phone calls to grantmakers to request additional information and the program guidelines. Develop a set of talking points for students to use during the call.
- Ask students to act as "editors," giving feedback on the language and clarity of the grant application before submission.
- Have students write to other schools/teachers who have received funding for similar projects from the intended grantmaker. The "recent grantees" information is available in the Annual Report or on the website of most grantmaking organizations.

I have found some potential matches, now what?

Now the real work begins. Review your list of potential funders. If they have a web site, visit it and carefully review all of the information about the funding program — including the funding guidelines, program interest, past grantees, and mission of the funding organization. If this information is not available on their web site or they don't have a web site, call, fax, or e-mail them directly and ask to have the guidelines sent to you.

Review the grant guidelines carefully. Many of your initial questions can be answered by reading the guidelines. Guidelines will tell you about:

submission deadlines

eligibility

proposal format

award levels

restrictions on the margins, spacing

evaluation process

number of pages

timetable budgets

funding goals and priorities

whom to contact

other submission requirements

Most “home pages” of the smaller corporate and foundation grantmakers’ web sites will bring you to the appropriate page for their grant information. For larger organizations, especially governmental organizations and corporations, it may be tricky to find the correct page. Try searching under **community interests, corporate citizenship, social responsibility**, etc. under the “About Us” or “Company Information” tab.

Once you have reviewed the guidelines, either on the web site or in print, and the organization seems like a good match, CALL TO VERIFY the status of the program. This is a very important step because crucial information about the grant may not be up to date, especially on a web site. For example, you may find that the program interest has changed, that a grantmaker is no longer accepting unsolicited proposals, or that due to financial restrictions, a company merger, or other circumstances, the program is temporary unavailable. Plan on making **at least two calls** to the organization. Initially, call to verify the basic information and then call again to verify the fine details after you have completed the application process and are ready to send your proposal.

During the first call, verify the:

- Application availability (when will the application for the next round be available if this year’s deadline has passed?)
- Deadline (is this a rolling, quarterly, or deadline that varies by year?)
- Program interest (does it match your project or curricular goals?)
- Any restrictions, or limitations (private/public school, subject discipline, geographic area, etc.)
- Proposal, application details (page limits, paper size, supporting documentation, etc.)
- Also, request the organization’s Annual Report and listing of previous grantees for the last several years (have they funded projects/programs like yours in the past?)

During the next call, verify the:

- Mailing address and contact person to receive the completed proposal (there may be personnel changes or a new mailing address)
- Submission format (fax acceptable?, mail only? plastic cover/binding preferred or discouraged?)
- Supporting documentation (necessary? discouraged?)
- Site visit (will they want to conduct one?)
- Interim/final report (is it a requirement? What will be expected?)

Demystifying the Lingo

No two grantmakers are the same and neither are their application processes. One grantmaker may simply require you to complete a 1-page **application** that can be downloaded from their website, while another grantmaker may request a **proposal** and other documentation, while yet another might ask you to submit a **cover letter** detailing your request. What's the difference?

An **application** is typically a form provided by the organization, either on their web site to be printed out, downloaded, or available upon request. Occasionally, some grantmakers may have applications available at their local stores or branch offices.

A **cover letter** typically includes the following: (limit to 1 page on organization letterhead):

- Organization (who you are and your brief background)
- Purpose of funding (what you plant to do with the money)
- Amount of your request should appear in the first paragraph (exactly how much you want)
- A contact name, phone number and address (e-mail and fax if applicable)

A **proposal** typically includes the following: (length may vary depending on organization but short, concise is best)

1. **Description of your school** or class discipline.

Who are we and how do we qualify to meet this need?

What is the purpose of this project/program?

What specific goals are we trying to achieve?

How does this funding request relate to the grantmaker's purpose, objectives, and priorities?

2. Statement about **how your project will be implemented and the results** you expect.

What specific objectives can be accomplished and how?

How will results be measured?

Who will do what?

What actions will you take to achieve your goals?

What steps must you take to achieve success?

What measurable milestones will you reach in meeting those goals?

How will you and the grantmaker know that you are making progress towards your goals?

3. A **total budget projection**, including other funds expected and the amount of your request.

How much money will the entire project/program cost?

What are other sources of funding you will be receiving?

How much money/materials are you requesting?

4. A **Statement of Need**.

What problem are you addressing?

What need is your project or program meeting?

Who will benefit and how?

5. Description of **how your proposal will fill any gaps** in other similar project/programs.

How is your project/program approach innovative or creative? How does it not "reinvent the wheel"?

6. A **general schedule** or timeline.

When will actions take place?

What are the start and end dates

What are the projected outcomes?

How will the activities be scheduled?

7. **Supporting materials** on the last pages of your document only if they are requested or you have received approval to include them.

10 THINGS TO DO TO ENSURE A GREAT PROPOSAL

1. MAKE THE RIGHT MATCH

Identify the right funding sources for your project.

2. GET THE FACTS

Contact the grantmakers to get specific information on the process, program interest, and deadlines.

3. BE ON TIME

Submit on or before the deadline.

4. BE CLEAR

Define your project clearly and concisely. Have all the details of the project well thought out from beginning to end.

5. KEEP THE LANGUAGE SIMPLE

Don't use any educational lingo that may confuse the reader. Reviewers may or may not be in the educational field. Use their language to connect to your project/program.

6. KEEP IT UPBEAT

Write in a positive tone that suggests your proposal will meet a need and will be successful. Leave out the "gloom and doom."

7. PROFESSIONAL LOOK

Submit a typewritten proposal. Have someone else read it for simple errors and clarity.

8. SEND IT TO THE RIGHT PERSON

Address the proposal as directed in the guidelines and verify to make sure that your contact is correct. Use a specific contact name, department, and address.

9. INCLUDE ALL THE RIGHT STUFF

Include all the required documentation as outlined in the guidelines. Don't forget authorized signatures as necessary!

10. FOLLOW-UP

Contact the funding source about the status, evaluation, and outcome of your proposal.

Regional Grants

This chapter includes grants available to K-12 teachers or schools on the **regional level only**. Grants are in alphabetical order by the name of the funding organization. By regional, we mean grants that are open only to applicants in the Chesapeake Bay watershed states: Maryland, Virginia, Washington, DC, Pennsylvania, West Virginia, Delaware and New York. In some cases, grant restrictions occur for certain counties or even specific towns in which funding organizations have a presence.

About the Icons

KEY	
≤	Less than \$1,000
\$	More than \$1,000
	Project Based
	Curriculum Based
	Easy Application
	Rolling Deadline

Each grant entry contains one or more corresponding icons that provide at-a-glance information about the grantmaker and the grant program.

Grants that award less \$1,000 are indicated by the less than or equal to symbol (≤), while awards of more than \$1,000 are indicated by the dollar symbol (\$). Whenever possible we have tried to include the exact amount awarded. While some funding levels are very specific, others vary from year to year or depending on the type and number of proposals received.

When an organizations' funding interest specifies the creation of a completed project, we indicate it by the hand icon (). When the funding interest specifies the creation of some type of curriculum we note it by the book icon (). Keep in mind that many grantmakers provide very general guidelines that do not specifically mention curriculum or projects. Call to get additional information about exactly what types of projects or curriculum programs they will fund.

Whenever we came across a grantmaker whose web site was viewer friendly and made all of the information available online, including the ability to download or print out an application for the grant, we indicate it by the paper symbol (.

Deadlines may be one of the biggest reasons that proposals are disqualified. It is easy to miss a deadline or learn about a grant only weeks or days before its deadline – and it can be frustrating when you have to wait until next year. There is not a standard schedule for all grantmakers. Some grantmakers set their deadlines according to the fiscal year for financial reasons and work on a quarterly deadline. More often a deadline is set for other reasons. Those grantmakers who allow for a “rolling deadline”– which means that proposals are accepted throughout the year– are indicated by the circular arrow symbol (.

Chesapeake Bay Trust

Description of Grant: The Chesapeake Bay Trust offers grants for qualified activities proposed by nonprofit organizations, community associations, civic groups, schools, and public agencies that contribute to the restoration of the Chesapeake Bay. The Trust favors action-oriented activities. Projects that unite business, government and citizen groups in activities that contribute to the restoration and protection of the Bay are encouraged. Priority is given to two principal areas: education projects that promote a behavior change toward the Bay and the performance of restoration activities that utilize volunteers.

Application Form Required? Yes No

Application available on web site.

Funding Amount: Varies.

Deadline: Proposals under \$1,000 are welcomed throughout the year.

Robins Foundation

Description of Grant: The Robins Foundation looks for opportunities to improve the lives and opportunities of Virginians through grants to non-profit organizations. They favor projects that bring people and resources together to meet a need, and have a lasting impact. Categories of support include, but are not limited to: cultural, charitable, scientific, environmental, and educational. The General Grants program is open to a wide range of causes. Most grants are awarded on a competitive basis, based on the importance of the need, consistency with the Robins Foundation's priorities, clarity of goals, and potential benefits of the grant, among other criteria.

Application Form Required? Yes No

Detailed proposal required.

Funding Amount: Varies.

Deadline: Preliminary proposals may be submitted at anytime.

Phone: 804- 697-7554

Fax: n/a

E-Mail: n/a

Web-site: <http://home.earthlink.net/~robinsfdn/index.html>

Special Note: Applications are accepted quarterly and grant awards are made twice a year, in June and December. This program has a two-step process, which begins with a preliminary proposal. Copies of the form to be used are available from the Robins Foundation office in Richmond. Grantmaking is normally limited to the Richmond metropolitan area. The Richmond Metropolitan area consists of the cities of Richmond, Petersburg, Hopewell and Colonial Heights and the nine surrounding counties.

TKF Foundation

Description of Grant: The TKF Foundation is dedicated to supporting Open Space, Sacred Spaces and Community Greening in Annapolis, MD, Baltimore, MD and Washington, DC areas. Its purpose is to fund organizations whose goals and programs benefit the connection of the human environment with the natural environment. The Open Spaces, Sacred Places program welcomes grant requests for projects such as community parks, recreation paths, and Bay buffers. The Community Greening program encourages community-based initiatives through small-scale plantings of flowers, trees, shrubs, and foliage, as well as urban gardens.

Application Form Required? Yes No

Detailed proposal required.

Funding Amount: Varies.
They also support a community celebration in connection with the finished project.

Deadline: *Open Spaces, Sacred Places* program
Oct 1- proposal deadline for January 15 decision.
April 1- proposal deadline for July 15 decision.

Community Greening program
August 1- proposal deadline for November 15 decision.

Each grant entry contains one or more icons that provide at-a-glance information about the grant maker and the grant program.

Grants that award less \$1,000 are indicated by the *less than or equal to* symbol (≤), while awards of more than \$1,000 are indicated by the dollar symbol (\$). Whenever possible we tried to include the exact amount awarded. Keep in mind that while some funding levels are very specific, others vary from year to year or depending on the type and number of proposals received.

When an organization’s funding interest specifies the creation of a completed project, we indicate it by the hand symbol (👉). When the funding interest specifies the creation of some type of curriculum we note it by the book symbol (📖). Many grant makers provide very general guidelines that do not specifically mention curriculum or projects. Call to get additional information about exactly what types of projects or curriculum programs they will fund.

Whenever we came across a grant maker whose web site was viewer friendly and made all of the grant information available online, including downloadable or printable application for the grant, we indicate it by the paper symbol (📄).

Deadlines may be one of the biggest reasons that proposals are disqualified. Since there is no standard schedule for all grant makers, it is easy to miss a deadline or learn about a grant only weeks or days before its deadline. Some grant makers set their deadlines according to their fiscal year and work on a quarterly deadline. But more often a deadline is set for other reasons. Grant makers who allow for a “rolling deadline”– which means that proposals are accepted throughout the year – are indicated by the circular arrow symbol (↻).

📄	Easy Application

Toyota Motor Sales, USA, Inc.

Description of Grant: Toyota sponsors the Toyota TAPESTRY program that offers grants to k-12 science teachers for innovative projects that enhance science education in the school and/or school district. Projects are funded in the environmental science education category that emphasize the efficient use of natural resources and protection of the environment. Students participating in these projects should gain an increased awareness of the terrestrial, aquatic, and/or atmospheric environment and an understanding of their own interdependence with the natural world.

Application Form Required? Yes No

Application can be downloaded from web site.

Funding Amount: Up to \$2,500 for mini-grants, \$10,000 for larger grants.

Deadline: Contact for deadline.

Wal-Mart Foundation

Description of Grant: The Wal-Mart Foundation provides grants in the areas of Community, Education, Children, and the Environment. The Community Matching Grant Program is the largest program funded by Wal-Mart and SAM'S CLUB. Local nonprofit organizations can raise funds at their stores, and Wal-Mart and SAM'S can match a portion of the funds raised. Wal-Mart and SAM'S CLUB provide grants to support environmental efforts and education in communities where their stores are located. All requests for funding must be directed through your local Wal-Mart.

Application Form Required? Yes No

Not specified on web site. Contact your local store for application procedures.

Funding Amount: Not specified.

Deadline: Not specified.

Contact Information

Visit your local Wal-Mart.

Phone: n/a

Fax: n/a

E-Mail: n/a

Web site: <http://www.walmartfoundation.org/wmstore/goodworks/scripts/index.jsp>

Special Note: While the web site does provide specific information about the Foundation's funding interests and who is and who is not eligible, few other details are available. The Foundation itself does not accept proposals. To learn more about receiving a grant from your local Wal-Mart or SAM'S CLUB, see the Community Involvement Coordinator at the store location closest to you.

Resources

To go further on your journey, visit some key grant funding web sites or review several grant books geared toward K-12 schools. Below are only a few of the many resources available on education and environment grants. Please note that we do not endorse any particular resource and only provide this information as a starting point. Our suggestions include:

Web sites

- **The School Grants** web site provides federal, state, and foundation-funding links for K-12 schools and includes grant-writing tips. www.schoolgrants.org
- **Education World Grants Center** provides a compilation of grants, grant writing, and grants by subject category resources: www.education-world.com/grants/.
- **The Foundation Center** offers a variety of resources and services, including regional workshops and seminars, grant databases, and other online resources, for schools and teachers seeking education support funding. <http://fdncenter.org/>. The Foundation Center has a library in Washington, DC that is open free to the public; no appointment is necessary. The **Foundation Center Library** is located at:
1627 K Street, NW, 3rd Fl, Washington, D.C. 20006-1708
Tel: (202) 331-1400, Fax: (202) 331-1739
Hours: Monday 10:00-8:00, Tuesday-Friday 10:00-5:00
- **The Center for Educational Reform** provides information on grants available for teachers, school programs and Education Reform Initiatives: www.edreform.com/info/grant.htm.
- **EE-Link** provides Environmental Education Resources on the Internet, including grants: www.nceet.snre.umich.edu/grants-generalinformation.html.
- **Fundsnet Online Services**, provides nonprofit organizations, with information on financial resources available on the Internet: www.fundsnet services.com

For information about **local grantmakers** visit these sites:

- *Washington Grantmakers*: www.washingtongrantmakers.org/WG/Home.asp
- *Association of Baltimore Area Grantmakers*: www.abagmd.org/

Periodicals

- **Education Grants Alert** -- A weekly newsletter on funding opportunities for K-12 grantseekers. 50 issues per year/ \$385. From Aspen Publishers, Inc. Phone: (800) 638-8437. Web site: www.aspenpub.com. Request a free trial sample.
- **Grants for K-12** -- A biweekly newsletter reports on public and private grants specifically for schools (\$149/year). Quinlan Publishing. Phone: (800) 229-2084. . Web site: www.quinlan.com. Also available: *Funding for Private Schools*. (\$129/year) Request a free trial sample.

Books

- **How to Get Grants and Gifts for the Public Schools** by Stanley Levenson (\$22.00).
- **The Grantwriter's Internet Companion: A Resource for Educators and Others Seeking Grants and Funding** by Susan Lee Peterson (\$24.95).

- **The Teacher's Guide to Winning Grants** by David G. Bauer (\$26.00).
- **Funding Sources for K-12 Schools and Adult Basic Education.** Oryx Press (\$36.00). Web site: www.greenwood.com.

We Want To Hear From You!

Do you know of a grant program geared towards K-12 schools with an environmental project or curriculum based focus? If so, let us hear about it! If we think it's a good fit for this publication, we will include it in the next volume. Just complete the form below and mail it to us at:

Chesapeake Bay Foundation
Attn: Chesapeake Classrooms
6 Herndon Avenue
Annapolis, MD 21403

If you have any suggestions about how we can improve this publication send them to us at:
