Nifty's Flagship — the new standard in hoophouse design

Standard Features:

- All parts are ready to bolt together for simple, quick assembly and clean lines on your finished hoophouse
- Lengths from 48’ to 192’
- Galvanized steel bows at 4’ on-center spacing
  - 1.660” Ø—14 gauge ground posts
  - 1.660” Ø—14 gauge bows
  - 1.315” Ø—16 gauge purlins and wind braces
- Crossbrace package— triple gusseted (1.315” Ø—16 gauge, every interior bow), spans 22’ across 30’ structure
- Wind bracing in every corner (16 diagonal braces in total)
- Poly-lock package
  - Double aluminum quick-lock (@hip) with cam inserts
  - End bow and endwall aluminum wire-lock channel and wiggle wire
- Durable 11-mil woven poly roll-up ventilation curtains (both sides)
  Roll-up sides include 5:1 geared roll-up cranks, 4 baffled end panels (poly overlap at curtain panel ends) and wind ropes individually attached every 12’
- Double layer inflated poly cover—6-mil 4-year clear over 6-mil 4-year IRAC (infrared-insulating, anti-condensation and diffusion properties)
- Steel-framed endwalls:
  - Double purpose endwalls with year-round “people access” at the main entry end and an 8’x8’ equipment access door at each end
  - 1.5” square steel assemblies, laid out to accommodate ventilation and door openings
  - 11-mil woven poly end wall covers with Velcro roll-up door panels
  - Hinged door—one 1 7/8” x 3’ x 6’8” foam core solid door & latch set
- Endwall ventilation: two 3’x4’ aluminum endwall louver (with our unique low-voltage/low-energy-use system—12V DC linear actuator motors and low-voltage thermostat controls, wired through our conduit system and ready for your electrical connection)
- End-to-end conduit system—1” PVC & fittings—for louver wiring & misc electrical functions
- Baseboards—2x10 SPF (untreated—meets organic certification criteria)

Upgrades Available:

- Automatic side ventilation — Motorize and automate your roll-up side ventilation (both sides—includes thermostatic control)
- Overhead irrigation — Two overhead irrigation lines attached to the tops of crossbraces. Each can be run independently
- Drip Irrigation Kit — Includes drip tape, header, valves, pressure reduction & filter, basic fittings
- Trellising Supplies — Roller-plast spools for tomatoes and other crops, support wire & tomato clips

Installation Service Available:

- Full Installation—Our team of professional installers comes to your farm and installs your hoophouse. Projects are usually competed in one day
- Community Build—Nifty Hoops supervises your crew of volunteers or helpers. Projects are usually completed in one day. Like an old-school barn raising!
- Starter Build—Our lead builder works with you for half a day, jump-starting your project—setting posts to a plane, standing an endwall and a few bows, and teaching you all the tricky parts of the build
- Delivery to Your Farm—With our flatbed moffett we can get your materials right where you need them on the farm
