- Fabricate and install (6) interior art plaques, various sizes. Painted aluminum. Fastened to wall with screws.

Save the Bay:

- Fabricate and install letters and CBF logo as ¼" - thick 316 alloy stainless steel forms. Blind stud mounted.

Watershed Map on living wall

- Design, fabricate and install Chesapeake Bay Watershed art sculpture on living bio wall. This will be an interior art installation that is incorporated into a living wall and will be subject to constant moisture, full shop drawings with specifications and details required.
 - Approximate size 7 feet x 5 feet – final size to be coordinate with bio wall design company.
 - Materials to be recommended and specified.

MATERIAL LIST: CBF will identify specific materials that cannot be used in the designed final products, such as PVC, before signing the contract in order to comply with the Living Building Challenge criteria. In addition, the fabrication and finishes of these signs should be able to withstand harsh weather conditions, sun, sand, salt, hurricane winds and flooding in an extreme marine environment. Bidder must verify existing signs on site to ensure consistency in finish, material, color, and typeface are consistent with existing items featured on the Brock Campus.
