

Potomac River Environmental Education Program

CHESAPEAKE BAY
FOUNDATION

Saving a National Treasure

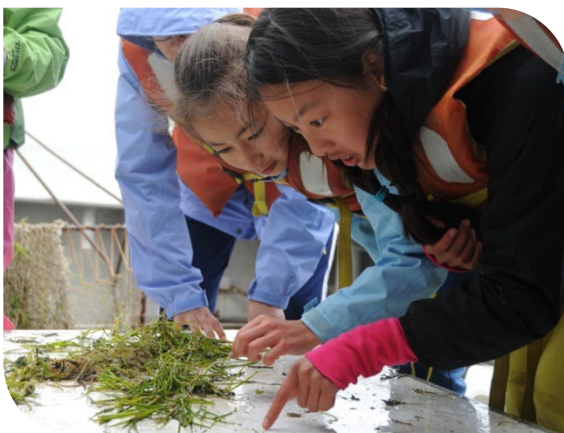

The Wharf Marina, 650 Wharf Street SW, Washington, D.C. 20024

LEARN OUTSIDE

The Chesapeake Bay Foundation provides engaging student programs designed to enhance and supplement classroom instruction. Join us on the Potomac River Environmental Education Program, based in the heart of the nation's capital at the confluence of the Potomac and Anacostia rivers. While aboard CBF's research workboat, participants test water quality, perform plankton studies, trawl for fish, and learn about the local features that impact the ecological integrity of the surrounding waterways. This program provides a unique opportunity to explore a hidden side of D.C., discover a diverse watershed of the Chesapeake, and investigate a habitat that few people witness.

Concepts

- Physical orientation
- Physical measurements
- Biological survey
- Interrelationships
- Human impact
- Water-quality testing

CBF Education is committed to growing connections between students, teachers, and school administrators to their environment. Program activities are designed to correlate to state learning standards. Whether through art, math, history, science, or social studies—our approach actively engages students in critical thinking on relevant real-world local environmental issues.

AGE GROUP	MAXIMUM CAPACITY
Grades 4 - 12	30 participants (including chaperones)
