

SUSQUEHANNA WATERSHED ENVIRONMENTAL EDUCATION PROGRAM

Locations throughout the state

Traveling by canoe on local creeks, rivers, or lakes, students investigate the ecology, history, and geography of the Susquehanna watershed and the Chesapeake Bay. These hands-on adventures introduce participants to the complex relationship between land use and aquatic habitats, local water quality, and the health of the Bay. They promote a deeper understanding of environmental issues, and motivate future leaders to take action to improve the water in their communities and beyond.

PROGRAM CONCEPTS

Here are some of the concepts and activities that may be emphasized during your field experience. Our staff will work with you during a pre-program phone call to tailor your experience so that it complements your classroom content.

- | | | |
|------------------------------|------------------------------------|--|
| ■ River and lake food chains | ■ Conservation behaviors | ■ Point source/non-point source pollution |
| ■ Fisheries management | ■ Sedimentation and eutrophication | ■ Freshwater ecology and characteristics |
| ■ Agricultural impact | ■ Mapping skills | ■ Watershed dynamics |
| ■ Land-use impact | ■ Forest creatures and habitats | ■ Environmentally conscious construction and development |

SAMPLE PROGRAM

For grades six and up. Maximum capacity is 23/26 participants (including chaperones).

To apply for a field experience, visit our website at cbf.org/apply. For inquiries, contact the CBF Scheduling Department at 410/268-8816.

- Introduction, canoe instruction, and safety
- Paddling and exploration
- Lunch
- Seining, water-quality testing, and mapping
- Load gear, wrap up
- Depart
